

PROJECT PLANNING AND SCHEDULING

Date	07 NOV 2025
Team id	NM2025TMID09101
Project	Streamlining ticket assignment for efficient support operations

Functional requiremen	User story	No.of activitie s	Team member s
Users	As an admin,I want to create user profiles with details like name, skills, availability, and role, So that the system can automatically assign tickets to the right support agents quickly and accurately.	1	Sharmi S
Groups	As an admin,I want to create groups based on skills, departments, or ticket types,So that tickets can be quickly assigned to the right team for faster and more efficient support.	1	Sharmi S
Roles	As an admin,I want to create roles with specific permissions and responsibilities,So that users can access only the features and data they need to perform their tasks efficiently and securely.	1	Pon divya N
Tables	As an admin,I want to create tables to store and organize data like users, groups, roles, and tickets,So that the system can easily manage and quickly access the information needed for efficient	1	Pon divya N
Assign roles & users to groups	As an admin,I want to assign specific roles and users to appropriate groups,So that tickets can be automatically routed to the right teams and handled by qualified agents quickly and	2	Pon divya N
Assign role to table	As an admin,I want to assign specific roles to tables,So that only authorized users can view, edit, or manage the data, ensuring secure and organized ticket assignment operations.	1	Shenba M
Create ACL	As an admin,I want to create Access Control Lists (ACLs) that define who can access or modify different parts of the system, So that ticket assignment and support data remain secure and only authorized users can make changes	1	Shenba M
Flow	As an admin,I want to create automated workflows that guide how tickets are assigned and processed,So that tickets move smoothly to the right agents or teams without delays,	2	Shenba M
